

EDUCATION

- **Yeshwantrao Chavan College of Engineering, Nagpur** 2022-26
B.Tech. in Information Technology
- **Lokmanya Tilak Vidyalaya and Junior College (HSC)** 2020-22
Maharashtra Board

EXPERIENCE

- **Capgemini** Jan 2026 – Present
Analyst Intern Remote, India
 - Completed software engineering training within the **Sogeti** unit, gaining hands-on experience with enterprise development workflows, project lifecycles and software engineering practices.
 - Designed and implemented a modular **Page Object Model** framework using **Java**, **Selenium**, **REST Assured** and **TestNG**, covering **19 test cases** across UI, API and hybrid end-to-end workflows mapped to **9 functional requirements**.
 - Implemented **42% negative test coverage** (8 of 19 cases), validating edge cases including invalid credentials, empty inputs, missing authentication tokens (401) and invalid resource IDs (400/404).
 - Implemented REST API validation using **JSON Schema** with a **2-second response-time threshold**, along with hybrid workflows verifying **UI-API data consistency** field by field.
 - Implemented **parallel execution across 3 threads** using ThreadLocal WebDriver, a **2-retry mechanism** for transient failures and automated **screenshot capture** for failed scenarios.
 - Integrated **Allure reporting** into a **Jenkins CI pipeline** for automated checkout, test execution, report generation and artifact archiving; latest full execution completed with **0 failures**.

PERSONAL PROJECTS

- **Imagex** June 2025
Full-stack AI image generation platform for generating images from natural-language prompts.
 - Built a full-stack image generation platform integrating the **ClipDrop API**, enabling prompt-based image generation through a responsive web interface.
 - Implemented a **credit-based usage system** with **5 free credits** for new users and **1 credit deducted per generation**, with paid credit plans integrated through **Razorpay**.
 - Implemented **REST API** communication between the frontend and backend, and deployed the application using **Vercel** and **Render**.
 - **Live Demo:** Imagex Web Application
- **SWAB** Sept 2024
AI-powered investment assistant for conversational financial information and domain-focused guidance.
 - Developed an interactive **React-based chatbot** integrating AI APIs to handle queries across **Mutual Funds, ETFs, Business and investment domains**.
 - Implemented API-driven conversational workflows and used **Thunder Client** to verify backend API interactions during development.
 - Built a conversational interface for presenting domain-specific financial information through structured responses.
- **BAAASC** Apr 2025
Standalone embedded emergency response and location-tracking system using GSM communication and GPS geolocation.
 - Integrated **ESP32, SIM800L GSM and Neo-6M GPS** on a TTGO T-Call platform, implementing standalone emergency communication and real-time location sharing without cloud dependency.
 - Implemented a **dual-trigger SOS mechanism**: a short press sends a Google Maps location via SMS, while a long press initiates a priority voice call with up to **3 retries**.
 - Achieved measured alert latency of **under 12 seconds** across tested environments, with location accuracy of **±2.1m** in open-field testing.
 - Optimized for low-power operation using a **3000mAh** battery, achieving **1.2mA standby current** and an estimated **3–5 days** of operation without recharging.

TECHNICAL SKILLS

- Languages:** Java, JavaScript
- Frameworks & Libraries:** React.js, React Native, Node.js, Express.js
- Developer Tools:** Git, GitHub, GitLab, Visual Studio Code, Cursor, Jenkins

ACHIEVEMENTS

- Hackathons:** 8-time National Hackathon Finalist; 2-time Winner
- Codeforces:** Specialist — Max. Rating: 1402
- Codolio:** 650+ Problems Solved

POSITIONS OF RESPONSIBILITY

- | | |
|--------------------------------------|-----------------|
| • Coordinator: IT Gaming Fest | <i>Apr 2024</i> |
| • Organizer: Code Hunt | <i>Apr 2025</i> |
